

INFORMACAST EMERGENCY NOTIFICATION SYSTEM

In any organization, the most important asset is its people. Whether it's severe weather, intruders, or a fire, you need to have systems and procedures to protect them in case of an emergency. InformaCast gives you the power to notify everyone in your building and even those working remote during a crisis.

InformaCast Advanced

Send notifications to on-premises devices throughout your building or campus.

InformaCast Mobile

Use a mobile app or web console to distribute notifications to mobile devices that reach people away from their desks or outside the building.

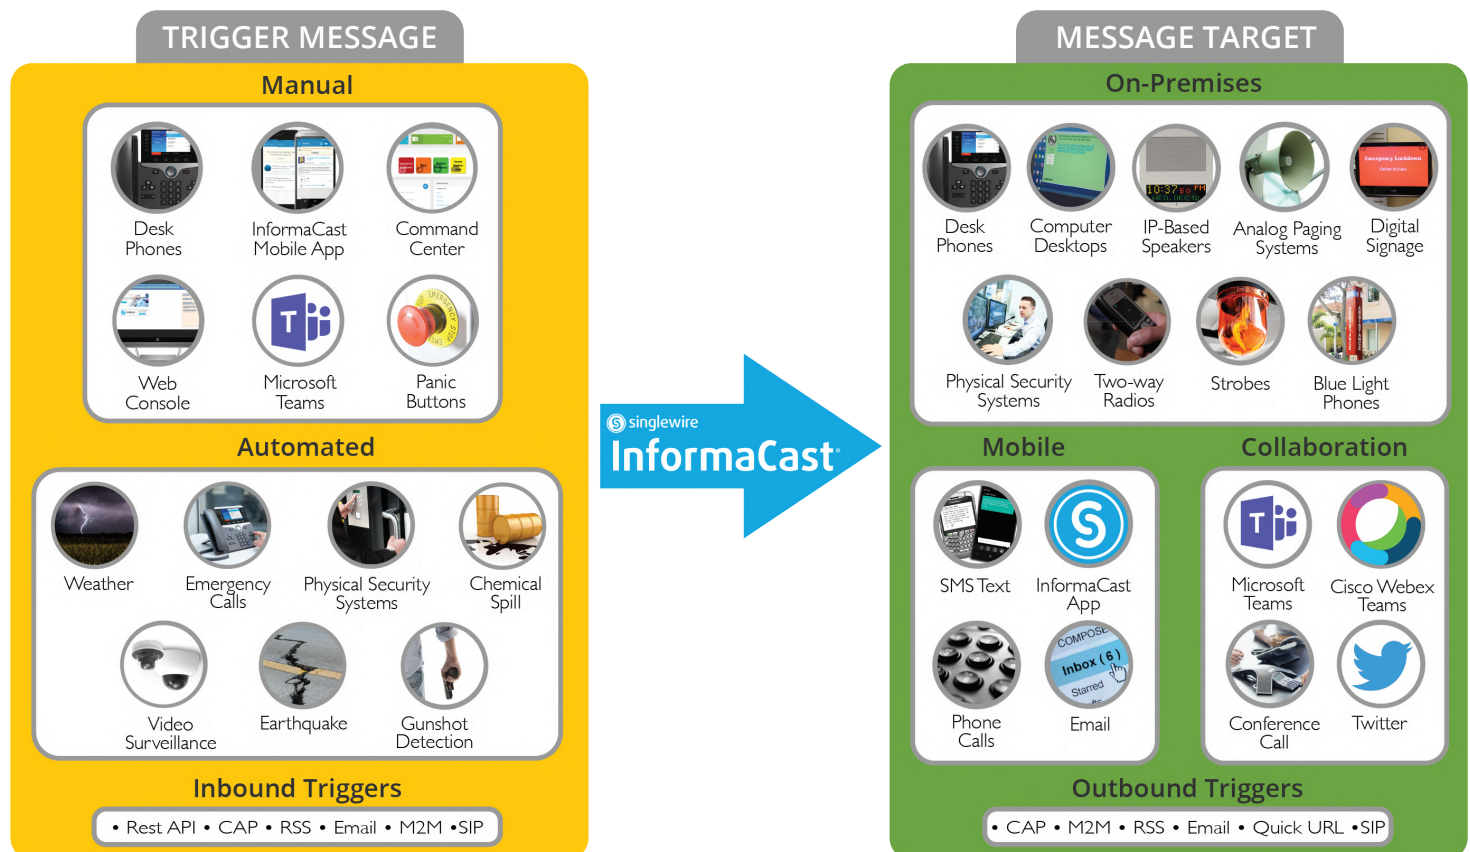

InformaCast Fusion

Provide the most complete coverage with notifications that reach people on-premises and on mobile devices.

REACH EVERYONE AND EVERYTHING

InformaCast notifications can be triggered and sent to a wide variety of devices and in many different formats. Visit singlewire.com/demo to see how.

KEEPING PEOPLE SAFE AND INFORMED. EVERYWHERE, EVERY TIME.

FEATURES

PANIC BUTTONS

Trigger InformaCast from phone soft keys, call buttons, keyboard function keys and low-voltage relay buttons to notify the proper personnel in case of an emergency.

911 ALERTING

Notify key personnel when 911 is dialed and listen to near real-time recordings so you can leverage the context for when a situation occurs.

SEVERE WEATHER

Monitor live feeds from the National Weather Service and automatically trigger an emergency notification when severe weather is approaching your area.

BUILDING LOCKDOWN

Perform a facility-wide lockdown in the event of an emergency by sending a live or prerecorded mass notification from a desk phone, mobile phone, or dedicated panic button, and activate physical security or lighting systems to secure buildings.

BUILDING EVACUATION

Inform key personnel of emergency situations and facilitate swift building evacuations through comprehensive emergency mass notification. Automatically dial your team to easily organize a response. Notify mobile users to stay away from the building.

SCHOOL BELLS

Schedule prerecorded notifications, such as school bells, shift changes, break reminders or safety alerts from a single interface and leverage existing analog overhead systems.

IOT INTEGRATION

Trigger a mass notifications to and from other physical systems, including fire alarms, light control systems, entry access systems, eyewash stations, and AED cabinet doors.

PAGING AND INTERCOM

Utilize live audio paging, ad hoc audio, two-way handsfree intercom and push-to talk functionalities with desk phones and IP speakers.
